# **A New Cherry**

## **THE ROYAL STEWART**

A new variety of the Royal Ann type, originating in Lane county, Oregon, but maturing from four to six weeks later than this standard variety. Fully as large as the Royal Ann and possessing all of its excellent qualities, but surpasses it in marketing features, especially for sections west of the Cascade Mountains where cherry crops are frequently damaged by rain just at the picking season. It has been claimed by authorities on the subject that a cherry equal in quality to the Royal Ann but ripening at a time to escape injury from rain would be worth a million dollars to the Willamette Valley alone. Such a cherry we feel sure we have found in the Royal Stewart. Is a firmer and better shipping variety than Black Republican.
